

## MALAGASY MINERALS LIMITED Activities Report for the March Quarter 2015

### HIGHLIGHTS

- During the March quarter Malagasy Minerals Limited announced results of its **maiden diamond drilling program** on four targets at the company's 100% owned Maniry Graphite Project in Southern Madagascar, confirming the presence of thick high-grade graphite horizons (ASX announcement 12<sup>th</sup> February 2015):
- A total of 17 diamond holes were completed for a total 1,588.6 metres. Significant widths and grades of graphite mineralisation were intersected in all drill holes in near surface positions. Outstanding results from this drilling include;

#### Razafy Target

MNDD001	26 metres @ 7.3%C from 2 metres (Includes 10 metres @ 10.2%C)
MNDD002	32 metres @ 7.0%C from 18 metres (Includes 8 metres @ 9.7%C)
MNDD003	26 metres @ 6.8%C from 0 metres (Includes 8 metres @ 8.8%C)
MNDD004	34 metres @ 8.5%C from 14 metres (Includes 12 metres @ 11.6%C)
MNDD010	34 metres @ 6.4%C from 0 metres (Includes 10 metres @ 8.1%C)
MNDD011	44 metres @ 6.4%C from 10 metres (Includes 10 metres @ 9.2%C)
MNDD012	24 metres @ 7.0%C from 0 metres (Includes 10 metres @ 8.4%C)
MNDD013	50 metres @ 6.9%C from 2 metres (Includes 26 metres @ 9.1%C)
MNDD017	38 metres @ 8.3%C from 34 metres (Includes 14 metres @ 11.3%C)

#### Haja Target

MNDD008	50 metres @ 6.0%C from 0 metres (Includes 8 metres @ 7.8%C)
MNDD009	70 metres @ 5.3%C from 2 metres (Includes 6 metres @ 9.2%C)
MNDD016	18 metres @ 6.0%C from 0 metres

#### Ivan Target

MNDD006	20 metres @ 7.0%C from 0 metres (Includes 8 metres @ 7.9%C)
MNDD007	16 metres @ 6.0%C from 0 metres (Includes 4 metres @ 8.1%C)

#### Fitia Target

MNDD014	16 metres @ 6.1%C from 0 metres
MNDD015	18 metres @ 6.0%C from 0 metres

## BACKGROUND

Malagasy Minerals Limited (ASX Code: MGY / “Malagasy”) has established a large exploration project in Southern Madagascar (Figure 2) that is prospective for both mafic-ultramafic intrusive related nickel-copper-platinum group metals (PGM) deposits and high-grade high-quality graphite deposits.

The graphite prospectivity of the region has been established by the discovery of the large, high-quality Molo Graphite Deposit by Energizer Resources Inc. (“Energizer”). Malagasy announced (27<sup>th</sup> March 2014) that it had finalized the sale of the company’s 25% interest in the project in order to crystallise significant value and to increase its focus on the company’s highly prospective 100% owned ground. The transaction has delivered a low-risk immediate return to Malagasy in the form of initial cash and share payments, whilst maintaining leveraged exposure through future benchmark cash and share payments.

Malagasy has been working to a strategy to define the potential of the 100% held ground to host additional high-grade graphite deposits that would have the potential to either enhance, or be enhanced by, the development of the Molo Graphite Deposit by Energizer. Malagasy is targeting a high-grade resource base with a particular focus on identifying near surface, low mining cost deposits that can be assessed quickly and at modest cost, potentially working off the benefits of the Molo development.

Figure (2) – Maniry Project Overview Plan

## GRAPHITE EXPLORATION and EVALUATION

### Maniry Project (100% MGY)

The Maniry Project is located in the southern part of the company’s Ampanihy Project (Figure 2.) and has been identified as being highly prospective for not only high-grade, high-quality graphite deposits but also for large-scale intrusive related nickel-copper-PGM deposits and molybdenum-selenium-REE deposits.

Graphite exploration has now been ongoing for 15 months at the Maniry Project. Malagasy Minerals has previously reported results to the ASX on the 6<sup>th</sup> August 2013, 21<sup>st</sup> November 2013, 13<sup>th</sup> June 2014 and 19<sup>th</sup> August 2014.

Malagasy believes these results have established the Maniry Project as a **“large-scale, world-class graphite province”**.

The Maniry Project has reached an advanced stage of exploration and has now been drill tested in order to provide initial confirmation of the size, grade and quality of the mineralisation. This drilling program was aimed at defining areas that have the potential to host higher-grade zones that can then be focused on to define an initial resource. The key understandings to date include:

- The high-grade graphite mineralisation occurs as defined layers and disseminations hosted by Proterozoic aged gneissic rocks. The Maniry Project area has been upgraded and structurally thickened due to folding on the margin of a large anorthosite intrusion;
- Exploration to date has defined at least 34 large-scale zones of prominently outcropping graphite mineralisation over an estimated area of 6.5km x 2.5km. The individual lenses within this area have strike extensions of up to 1.8km and can attain widths of up to 350m (Figure 3);
- Sampling of the mineralisation indicates consistent grades with low variability and the potential for areas of very high-grade mineralisation (peak result 50.78%C). A total of 464 samples have now been taken across the Maniry Project area. The grade characteristics of the samples are demonstrated in the following tabulation (A full summary of sampling results is provided in Table 1);

Total samples (>5% COG)	Total Graphitic Carbon Assay Results (all sampling)			
	%	Samples	Cumulative %	Cumulative Samples
>20%C	5%	21	5%	21
12-20%C	15%	69	19%	90
10-12%C	15%	68	34%	158
8-10%C	25%	115	59%	273
5-8%C	41%	191	100%	464
Peak Result	<b>50.78%C</b>			

**Table (1) – Summary of sampling results.**

- The 17 hole (1588.6m) diamond drilling program tested the four (4) highest priority targets within the Maniry Project (Figure 3a & 3b). The targets are named **Razafy, Ivan, Haja and Fitia**. The aim of the program was to:
  - Provide a diagnostic test of the thickness and geometry of the lenses to confirm and validate the results from the surface sampling and mapping;
  - Provide unbiased samples for assay;
  - Determine the nature and geological association of the mineralisation; and
  - Highlight the area most likely to deliver a JORC compliant resource in the shortest time period.
- The drilling program was completed with the company owned drilling equipment at a cost of approximately A\$50 per metre;
- As previously reported the field assessment of the graphite flake size demonstrates a consistently coarse flake size. Previously completed petrological analysis of selected samples has confirmed the high quality nature of the graphite. The graphite flake size is generally >0.7mm with some material as coarse as several millimetres. The graphite samples examined are largely free from inclusions of other minerals;
- Assay results from the diamond drilling program are currently being finalized and will be reported when complete.

Hole_ID	Prospect	Depth (m)	Easting	Northing	RL (m)	Azimuth	Dip

## **NICKEL-COPPER-PGM EXPLORATION – Ampanihy Project (100% of non-industrial mineral rights)**

The **Ampanihy Project** has been confirmed to host a significant suite of mafic-ultramafic intrusive rocks that have demonstrated potential to host nickel-copper-PGM mineralisation. Having established that the application of systematic regional geochemical sampling and programs of mapping and rock chip sampling is the most effective way of exploring the entire 110km strike of the project, a work program involving the collection of systematic geochemical soil samples has been undertaken across the entire project.

The first phase of this work was completed in the 2013 field season (4000 samples) and resulted in the identification of two strong geochemically anomalous areas that are host to a cluster of prospective mafic-ultramafic intrusions.

The results of a subsequent sampling program will be reported as the results become available.

---

## **CORPORATE**

### **Financial Position**

The Company's cash position at 31 March was \$205,000 a decrease of \$540,000 for the quarter. During the quarter payments totaling \$271,000 were made for the company's annual tenement fees.

The Company is seeking to progress further asset sales to supplement its cash position.

### **Political Situation**

The political situation in Madagascar has progressed through democratic elections for the President and the parliament, resulting in the induction of a president, prime minister and government ministers. The international community subsequently began a process of re-engagement with Madagascar, with the prospect of trade and aid relationships being resumed.

Notwithstanding these encouraging developments the Bureau du Cadastre Minier de Madagascar (BCMM), responsible for the regulation and administration of the country's mining tenements, has not begun to deal with the backlog of transactions which has built up over a number of years. Malagasy has tenement applications, tenement renewals, the registration of additional minerals on the permits and the registration of sub-leases to EGZ with the BCMM for processing.

### **Tenements**

A full listing of the company's tenements in Madagascar is included as Appendix 1. There have been no changes to the tenements held during the quarter.

### ***For and on behalf of the Board***

**Peter Langworthy**  
**Technical Director**

### ***Competent Persons Statement***

*The information in this report that relates to Exploration Results or Mineral Resources is based on information compiled or reviewed by Mr. Peter Langworthy, Technical Director, who is a Member of the Australian Institute of Mining and Metallurgy. Mr. Peter Langworthy is a full time Director of Malagasy Minerals Limited and has sufficient experience, which is relevant to the style of mineralisation and types of deposit under consideration and to the activities undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code of Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr. Peter Langworthy consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.*

#### NOTES

- 1) 100% - IM indicates tenements held by MDA and Industrial Minerals rights sub-leased to Energizer Resources Inc.
- 2) Renewal awaiting confirmation from BCMM. All annual fees have been paid up to 31 December 2014
- 3) SQNY – Royalty and partial tenement fees payable to MDA
- 4) GGJV means the Green Giant Joint Venture for non-industrial minerals, between Malagasy Minerals Limited (75%) and Energizer Resources Inc. (25%). Energizer holds the tenements 100% and retains the rights to industrial minerals.

#### Acquisition and disposal of tenements

- 1) No tenements were acquired during the quarter.
- 2) Details of tenements disposed of during the quarter can be found in the quarterly activities report, to which this schedule is appended.
- 3) No beneficial interests in farm-in or farm-out agreements were acquired or disposed of during the quarter other than the Company has advised Energizer that it wishes to terminate the Green Giant Joint Venture.

	Company secretarial, accounting & administration services	14
		60

**Non-cash financing and investing activities**

- 2.1 Details of financing and investing transactions which have had a material effect on consolidated assets and liabilities but did not involve cash flows

Nil

- 2.2 Details of outlays made by other entities to establish or increase their share in projects in which the reporting entity has an interest

Nil

**Financing facilities available**

*Add notes as necessary for an understanding of the position.*

	Amount available \$A'000	Amount used \$A'000
3.1	Loan facilities	-
3.2	Credit standby arrangements	-

+ See chapter 19 for defined terms.

### Estimated cash outflows for next quarter

	\$A'000
4.1 Exploration and evaluation	(100)
4.2 Development	-
4.3 Production	-
4.4 Administration (Net)	(50)
<b>Total</b>	<b>(150)</b>

### Reconciliation of cash

Reconciliation of cash at the end of the quarter (as shown in the consolidated statement of cash flows) to the related items in the accounts is as follows.	Current quarter \$A'000	Previous quarter \$A'000
5.1 Cash on hand and at bank	<b>91</b>	<b>334</b>
5.2 Term Deposit	<b>114</b>	<b>411</b>
5.3 Bank overdraft	-	-
5.4 Other (provide details)	-	-
<b>Total: cash at end of quarter (item 1.22)</b>	<b>205</b>	<b>745</b>

### Changes in interests in mining tenements

	Tenement reference	Nature of interest (note (2))	Interest at beginning of quarter	Interest at end of quarter
6.1	Interests in mining tenements relinquished, reduced or lapsed	Refer to Covering Quarterly Activity Report attached hereto		
6.2	Interests in mining tenements acquired or increased	Refer to Covering Quarterly Activity Report attached hereto		

### Issued and quoted securities at end of current quarter

Description includes rate of interest and any redemption or conversion rights together with prices and dates.

	Total number	Number quoted	Issue price per security (see note 3) (cents)	Amount paid up per security (see note 3) (cents)
7.1 <b>Preference *securities</b>	Nil	Nil	-	-

Date: 29 April 2015

**Notes**

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 Issued and quoted securities. The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
- 5 Accounting Standards. ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
